

Fördersysteme - vom Ladungsträger bis zur Fördertechnik

Schlaues Design für wirtschaftlichen Vorsprung in der Intralogistik

If you need a consulting partner with plenty of experience in conveyor systems, look no further. We have the answers you are looking for.

Intralogistics challenges can be met in different ways. Our unrivalled and manifold range of products and services allow us to offer you the most efficient solution among various alternatives. This holds true regardless of whether you want to convey pallets, bulky goods or used cartons.

Naturally, we also interlink our conveyor systems with order picking systems and fully automatic warehouse systems (e.g.: small parts or high-rise pallet racking system), which also belong to our range of products.

Benefit from expertise and proven skills in consulting, planning and implementing conveyor systems of numerous large international projects. SSI SCHAEFER supplies everything, all from one source, from load carriers to controls to conveyor technology. The high quality and compatibility of our components render the entire system trouble-free and result in safety of investment.

Your advantages:

- Complete solutions all from one source
- Uniquely manifold range of solutions for virtually any type of goods or load carrier
- Continuous productivity thanks to reliable components
- High efficiency and throughput thanks to the latest technology

Wherever people are working directly at our conveyor systems, we focus on ergonomic aspects. Our concept ergonomics@work!® promotes a more comfortable interaction between technology and employees, and thus increases productivity, for example by using plastic or wood coverings instead of cold metal and noise-reducing conveyor technology.
