

## Fördersysteme für Alt-Kartonage

Abtransport von Altkartonagen aus Kommissionierung oder Automatenbefüllung

Do you need a reliable solution for the removal of used cartons, for example from your order picking department or automatic filling?

If so, SSI SCHAEFER is able to provide the right solution consisting of high quality conveyor technology components, the specially modified transitions between the conveyors and the side walls modified according to throughput requirements.

Naturally, the control software and the necessary services are also available from one single source. This way, we are able to provide maximum compatibility and a smooth-running system. This holds true irrespective of whether the conveyor technology is supposed to go into an existing system or a new one. And because of its overhead installation, this conveyor technology takes up virtually no space.

### The advantages from SSI SCHAEFER:

- A complete system all from one source
- Error-free transport of the used cartons
- High quality, robust components
- A tidy warehouse
