

## Automatische Kommissionierung für optimalen Materialfluss

Effiziente Logistikprozesse für eine schnelle Auftragsabwicklung

Would you like to enjoy a high level of productivity, optimal flow of material and consistent quality, even when picking at peak capacity? Order picking systems by SSI SCHAEFER carry out the compilation of complex orders in a fast, reliable and fully automated way.

Besides being highly efficient, our solutions posses other key features as well:

- Easy maintenance due to adjustable product channels
- Easy integration into existing systems
- Great options for extension thanks to the modular design

Our systems are designed for maximum product density. Therefore, by using order picking systems by SSI SCHAEFER, you also optimise space utilisation in your warehouse.

### Perfect interplay

Naturally all automated picking systems from SSI SCHAEFER are perfectly coordinated with the systems and other components we produce. The different types of systems can be combined: they are available for any standard product or product group. Based on a precise analysis of the data, we provide individual solutions, according to your specific requirements, as well as calculating the potential for optimisation in your warehouse.
