

## Intralogistik Generalunternehmer

Effizienz und Kompetenz: Logistik-Lösungen aus einer Hand

As a general contractor we provide our customers with comprehensive and professional services. We carry out the entire project management in warehouse construction from concept to handover of a complete, turnkey facility.

### In overview:

- Planning and consultancy
- Construction services and foundation measures
- Steel construction and racking systems
- Warehouse control and management systems
- Highly dynamic order picking systems
- Storage and retrieval devices
- Conveyor technology for pallets, containers, cartons and trays
- Service and maintenance
- Turnkey solutions

The core of our logistics solutions are standardised products that are designed, developed and manufactured in-house. The comprehensive range of products allows for customised system solutions from SSI Schaefer.

### Strong partner, strong performance

The experience, the synergies and the innovation of our entire company allow us to offer cost-effective package deals with reliability, availability and rapid project implementation.

The combination of expertise and efficiency results in long-term and sustainable safety of investment for our customers.
